

Sourcing Sustainable Palm Oil

Flavorchem Corporation sources palm oil and palm derived ingredients for use in the manufacture of flavors and fragrances. Flavorchem recognizes the global environmental impacts that irresponsible palm tree cultivation has caused and continues to cause in regard to deforestation, the destruction of natural ecosystems, and associated human rights issues. In conjunction with our Sustainable Procurement Policy and supplier code of conduct, the company is committed to addressing our reliance on materials with harmful environmental and social impacts. As we progress, Flavorchem aims to procure palm derived materials from only sustainable sources.

Flavorchem Corporation supports the efforts of the Roundtable on Sustainable Palm Oil (RSPO) in developing standards to help minimize the negative impact of palm oil cultivation on the environment and communities in palm oil-producing regions. As awareness and consumer demand for sustainably sourced palm oil increases, the company foresees an increasing proportion of our palm derived ingredients to be sustainably sourced. In addition, the company is looking to take a more proactive approach regarding several raw materials in order to reduce the overall use of non-sustainably sourced palm derived ingredients in our finished products.

We will monitor and quantify the company's progress in reducing our use of non-sustainably sourced palm oil through key metrics available in our annual sustainability reports.
